

STEERING SHAFT CARDAN KR 80x115

PRODUCT HIGHLIGHTS

- ▶ Steering Shaft Cardan KR 80x115 is used in steering control systems for vehicles and serves to connect steering post elements with input steering shaft or intermediates.
- ▶ Steering Shaft Cardan KR 80x115 provides torque transmission and compensates disalignment of these elements when their axes criss-cross by configuration.

TECHNICAL SPECIFICATIONS

Maximum rotation torque, nm	125
Static moment, nm, not more than	500
Maximum accepted angle of cardan joints slope	35
Overall dimensions, not more, mm	
- length	115...201
- diameter	80
Weight, kg	1,2...1,7

APPLICATION

- ▶ Buses
- ▶ Trolleybuses
- ▶ Commercial vehicle
